

Primer

Silikat-Fixativ

Silicate primer concentrate for thinning silicate paints for interior and exterior use.

Material Properties

Suitable as a primer for consolidating and levelling highly or differently absorbent mineral substrates.

Substrate

Primer to promote adhesion and reduce the absorbency of the substrate.

- To avoid differences in colour, a homogeneous substrate must be created with regard to material and drying.
- Not suitable for horizontal surfaces.
- Do not apply to damp or dirty surfaces.

Consumption

ca. 0,10–0,20 l/m² per coat

Technical Data

- **Type** // Primer
- **Consistency** // liquid
- **Binder** // potassium silicate with organic stabilisers
- **Density** // ca. 1,0 g/cm³

Application

Shake and add when stirring silicate paints or silicate plasters until the desired application consistency is achieved (max. 10 % by volume). When used as a primer, dilute with water depending on the absorption behaviour of the substrate, for highly absorbent substrates up to a ratio of 1:1. Apply with a brush or paintbrush. The best solidifying effect is achieved by saturating the surface. Application with a roller or spray gun is less suitable. Clean tools with water immediately after use. Adjacent surfaces, especially glass, plastics, natural stone, metals, etc. carefully to avoid etching. Wash off splashes immediately with plenty of water. Do not use at air and building temperatures below +8°C or in direct sunlight, draughts or expected night frosts.

Caution: corrosive! Keep out of reach of children.

Protect glass panes, tiles, clinker, marble and plants from splashes. Thoroughly clean surfaces contaminated with paint splashes immediately with water. In case of contact with eyes and skin, rinse immediately with water. Do not inhale spray mist when spraying! Do not allow to enter watercourses and drains!

Surface procurement

After sufficient drying (at least 24 hours at 20°C), coat with mineral or paste-like finishing plasters.

Packaging

- 10 l/canister
- 5,0 l/canister
- 2,5 l/canister
- 1,0 l/can
- 40 canisters/pallet
- 80 canisters/pallet
- 100 canisters/pallet
- 100 cans/pallet

Storage

Store the canister or can tightly closed in a cool and frost-free place.
